Advanced Trauma Life Support Questions And Answers

As part of a project, I've had a look at several of the ATLS written tests, and several triage scenarios written by surgeons. It is *SHOCKING* how many answers are actually wrong. I applaud the original surgeon who developed the whole concept of ATLS, but the fact that this is run by the American College of Surgery is embarrassing.

Surgeons "knowing" ATLS | Student Doctor Network

The three parameters are: the GCS, systemic blood pressure (SBP), and the respiratory rate (RR). These include the inability to accurately score patients who are intubated and mechanically ventilated. A total score of 1-10 indicates priority T1, 11 indicates T2, and 12 indicates T3. A score of 0 means dead.

Trauma Triage and Scoring; about Trauma Triage | Patient

Advanced Trauma Life Support (ATLS) was created to improve evaluation and management of traumatic injuries. Unfortunately, the literature often outpaces guidelines. This 10th edition provides several important updates for clinicians managing trauma.

The other difficult thing about ATLS (ACLS and BLS and PALS), is that on paper, there is a correct order. In life, that order still exists, but almost simultaneously. I remember even from when I took it, one question got me - asked which comes first - thoracotomy or intubation?

ATLS failure | Student Doctor Network

Everyone understands START triage is a rapid first process. You do your best in tough circumstances. If your answers differ from mine, realize even professionals assess patients differently. START triage guides the initial treatment and transport of patients, but triage should continue every step of the way.
