MoparPartsGiant

Although there are four different cylinder bore sizes, Chrysler made two basic blocks. One is the 273, 318, and 5.2L block; the other is the 340, 360, and 5.9L block. Most A-engines use a motor-mount design that attaches to the sides of the block close to the front, and the mount ears and bolts are parallel to the cam centerline.
