Engine timing chains in all engines do suffer from wear as they are moving parts within the engine. However with the Nissan engine, the factory chain configuration is not adequate for the work that it is subjected to. The result therefore is premature wear in the chains. We recommend that the timing chains in the YD25 engine be inspected for wear when the engines have travelled 100,000 kilometres and every 40,000 km thereafter. These engines can have a worn chain but present no abnormal ...
