The magic lantern, also known by its Latin name *lanterna magica*, is an early type of image projector that used pictures—paintings, prints, or photographs—on transparent plates (usually made of glass), one or more lenses, and a light source. It was mostly developed in the 17th century and commonly used for entertainment purposes. It was increasingly used for education during the 19th century.

A friend recommended this book to me, since she had purchased the Magic Lantern Guide for her specific camera and loved it. I wish this book had come with my camera because I had no idea about some of the settings and tricks for better photos. The generic manual that came with my camera is obviously printed for many other Nikon camera, too.

Magic Lantern is loaded with features that are not found in the stock Canon menus. The absence of these features in Canon cameras is, quite frankly, why Magic Lantern exists in the first place. It would be nice if Canon included some of these features, like some of the other manufacturers, but that is a topic for another article.
